

DISCOVER THE POWER

OF YOU.

Master of Science in Nursing Leadership

Your future begins at the University of the Incarnate Word. Here you'll find one of the most successful nursing programs in the region offering excellent graduate programs including the Master of Science in Nursing Leadership degree. This flexible program of study allows the student to apply knowledge and expertise to improve healthcare for clients at the systems level of care.

"The MSN in Nursing Leadership is designed to prepare nurses for roles in executive and advanced health care leadership. It provides nurses with administrative and management theory and skills in order to address organizational issues within complex health care systems and community-based agencies."

Unique Features:

- Designed for working nurses who desire career advancement and a high quality graduate education.
- 31 credit degree plan taking 6 credits per semester, can be completed in 24 months. Classes held on Tuesday evening, every other week, alternating with online coursework.
- Cross-cultural perspectives on health behavior and values, with an emphasis on existing health disparities.
- Active recruitment of students and faculty from diverse racial and ethnic backgrounds to enrich student learning.
